The San Bernardino Microwave Society will meet April 1, 2021 at 1900 PDT (4/2/21 at 0200 UTC) on the Cactus Intertie, Zoom, and Amateur Television Network with a feed to YouTube (Amateur Television Network Live).

After the roll call and activity reports, the Technical Talk will be given by Doug Millar K6JEY on receiver Signal To Noise Optimization- equipment and techniques to get the most out of your receiving system. We will be reviewing harmonic distortion, SINAD, and noise figure meter techniques using both old and very modern equipment. The talk should be good for receiver systems from LF to "warm rocks". There will also be a focus on gain balancing microwave receiver systems.

The Zoom link for the meeting will be sent out Thursday.
